

BMCC – Using MyMathLab – Fall 2014

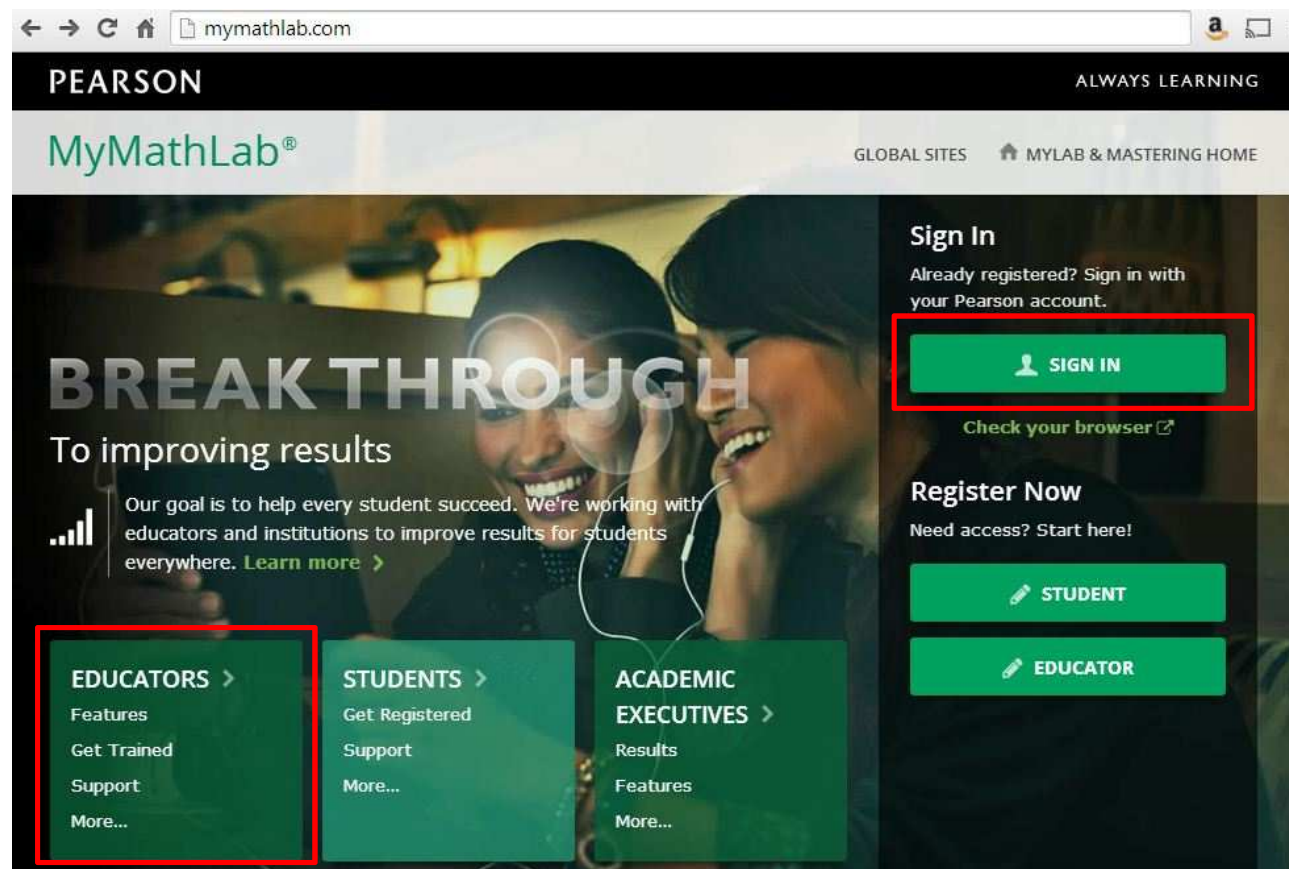

After registering, the coordinator/trainer will elevate you to “instructor” status. After this is complete, you will have access to the necessary buttons to control your course.

MyMathLab is a premium version of what many of you have used in the past, MathXL. It is the same engine embedded inside a powerful course management system that allows for more flexibility, greater customization, an easier registration process, built-in temporary access for students on aid, and many additional media features.

Once registered in MML, students who are repeating the course will easily be able to join the next course using the same book without being prompted to re-register or pay again. All you have to do is provide them with the correct CourseID(s) which you will always see after logging into your account.

The following screenshots will walk you through what MML looks like from an instructor point of view. While you are your own student inside the system, you do have access to the assignment manger, gradebook, and other educator-only tools. If you are in need of assistance, please visit support here: <http://tinyurl.com/mmleducator14>, or call 1-888-695-6577.
