

Hello Everyone,

Attached is our new final review for Math 56. The computer lab is printing copies as well, but it may take some time to print. Feel free to use this version and photocopy to give to your Math 56 class to begin studying for the finals.

Note that there are 8 pages of questions on this new review, it is quite comprehensive (solutions to each question are included).

The NEW structure of the 56 Final exam contains two parts, one part with the calculator, and one part without. The questions that will be appropriate for calculator use on the final are marked by a calculator symbol next to the questions on the review sheet.

All students will need (non-graphing) calculators for the final review. If they don't have one, they can borrow one from the BMCC library.

Feel free to e-mail me if you have any other questions about the Math 56 review or final exam.

Kindest Regards,

Jenna Hirsch
